We learned the names of the counties in Arizona.

And we also learned how big they are and how much land they cover.

And we learned that there are 15 counties in Arizona.

Most county names are Indian and Spanish.

Phoenix is in Maricopa county.

Coconino county is the biggest county in Arizona.

Santa Cruz is the smallest county in Arizona.

We learned where the counties are in Arizona.

The Grand Canyon is in Mohave.

The four corners are in Apache county.
We would like you to select our project of Arizona and its counties. We have worked hard on this project and have several reasons why you should choose us.

We are Honor Roll students and could be trusted to do this report and any other work required for this project.

You should pick our map because we have used the colors of the Arizona flag in our design. The bright colors that we have chosen are: yellow, purple, red, and blue. The colors stand out. We chose these colors because these are beautiful flower colors.

We have kept the cost of the project down. We kept the cost down by not using so many colors on the map. We used 4 colors. We estimate the cost of the project will be $99. The red paint will cost $15 and will paint 5 counties. The yellow paint will cost $24 and paint 4 counties. The blue paint will cost $36 and paint 4 counties. The purple paint will cost $24 and paint 2 counties.

We would be exited if you picked us to be on your website. This was a good learning experince.
