Silk Road Data Sheet

**Begins:** Xian, China

**Ends:** Constantinople, Byzantine Empire

**Length:** 8,000 miles plus

**Lasted:** 1,500 years (third century B.C. to fifteenth century A.D.)

**Linked:** China, India, the Arab world, Europe

**Items West:** (To Europe): silk, porcelain, lacquerware, spices, gems, furs, incense, ivory, printing process, papermaking, ceramic glazing, astronomy, carpets, pyrotechnology, disease (Behcet’s Syndrome, Bubonic Plague)

**Items East:** (To China) Islam, Buddhism, Christianity, metal technologies (steel), horses (Arabian, Akhal Tekes), alfalfa, pomegranates, grape vines, winemaking, wool, tapestry, leather, raisins, dates, jade, glass, spices, ivory

**Items Both Ways:** music, culture, technology, food items, luxury items

**Implications:**
- European voyages of exploration to control spice trade.
- Creation of paper money in Europe causes economic changes (banking, loans, merchant class).
- Paper and printing process creates cheaper books thus taking knowledge control away from the Church.
- Pyrotechnology revolutionizes warfare, social structure, and government (end of feudalism).
- New art forms due to glazing and lacquering techniques.
- Movement of nomads disrupts and/or destroys Asian kingdoms (nomads conquer Bactria, an old Greek kingdom; Mongols create an empire).
- Asia becomes a mosaic of religions; develops religious toleration.
- Warfare changes due to new metal technologies and better horses.
- Gradual self-imposed isolation by certain Asian powers (China forbids foreign travel, Japan expels foreigners).
