Presented by
Yuma County Education Service and the Arizona Geographic Alliance

Why should you come to the GeoMath Workshop?

- New lessons that will save you time preparing your day and still help you teach to the standards
- Hands-on demonstrations of lessons that will help you meet and beat those state mandated mathematics tests
- Recertification hours (6)
- Participants will receive their own copy of the Alliance GeoMath CD containing 85 K-8 geography lessons integrating mathematics skills and concepts at the conclusion of the workshop

What is GeoMath?

GeoMath is a grades K-8 program of 85 lessons based on the Arizona state standards for geography and mathematics. Created by Arizona teachers, these lessons provide teacher instructions, student handouts, answer keys, maps, student samples, graphics and photos, and assessments that mirror state-mandated testing. It is a complete package of lessons to aid you in keeping social studies in the classroom while working on raising the math scores of your students. Piloting results from over 20 Arizona school districts show that GeoMath lessons teach both geography concepts and math skills and concepts.

Quotes from Yuma area teachers about a previous Alliance workshop:

"This was definitely worth my time!"
-- 5th grade teacher at O. C. Johnson

"Great lessons - works well with AZ standards."
teacher at STARS Learning Center

"Please come back."
-- 3rd grade teacher at Roosevelt

"Great workshop."
-- 7th grade teacher at Woodard Jr. High

"Well worth the time (even on a Saturday) -- Very glad I attended."
-- 7th grade teacher at Gila Vista Jr. High

"It was so nice to get these items so I can start using them right away. I want to teach geography in an easier, quicker, more interesting way -- this will allow me to do that."
-- 4th and 5th grade teacher at James B. Rolle
