Find and underline or highlight these eleven important sentences on the Geography of Ancient Greece Handout:

1. At the same time that the Shang dynasty was ruling much of the Huang He River valley and the Egyptian pharaohs were building the New Kingdom along the Nile, another civilization was beginning, along the northeastern shores of the Mediterranean Sea.

2. Greeks found themselves on a peninsula, a piece of land almost entirely surrounded by the sea, with a rocky landscape that offered few natural resources.

3. The modern day country of Greece includes not only the mainland portion, but also includes hundreds of islands.

4. Mountains and hills cover nearly three-fourths of Greece.

5. The land is not very fertile, either, but farmers herd goats and sheep on the rugged hillsides.

6. Eastern Greece has more land suitable for farming.

7. Ancient Greeks raised crops and animals well suited to the environment.

8. The many hills and mountains provided shrubs to feed the herds of sheep, goats, and cattle.

9. Because farming didn’t produce huge surpluses, and travel across the terrain was difficult, the Greeks came to depend on the sea.

10. Traders from all over were eager to exchange their goods for Greece’s olive oil, wool, and wine.
At the same time that the Shang dynasty was ruling much of the Huang He River valley and the Egyptian pharaohs were building the New Kingdom along the Nile, another civilization was beginning, along the northeastern shores of the Mediterranean Sea. The civilization was that of the ancient Greeks.

In Greece, there was no great river carrying layers of fertile silt to create rich farmland. Instead of finding themselves in an environment provided by a river valley, ancient Greeks found themselves on a peninsula, a piece of land almost entirely surrounded by the sea, with a rocky landscape that offered few natural resources.

Ancient Greece was located on the southern European mainland. The modern day country of Greece includes not only the mainland portion, but also includes hundreds of islands. The biggest of these islands is Crete, south of the mainland. Northeast of Crete is another large island called Rhodes.

Mountains and hills cover nearly three-fourths of Greece. Western Greece is the most mountainous, and there, travel by land is very difficult. The land is not very fertile, either, but farmers herd goats and sheep on the rugged hillsides.

Eastern Greece has more land suitable for farming. Some of these farmlands are on the peninsula of Attica. Attica also has excellent natural harbors, or sheltered places, for ships. Peloponnesus, a large peninsula southwest of Attica, is a mountainous region outlined by a thin area of fertile soil. Here can be found several rivers, but unlike rivers in Egypt or Mesopotamia, these rivers dry up in the summer.

The climate of Greece also presented a challenge for early farmers. Summers were hot and dry, and winters were wet and windy. Ancient Greeks raised crops and animals well suited to the environment. Wheat and barley were grown, and olives and grapes were harvested. The many hills and mountains provided shrubs to feed the herds of sheep, goats, and cattle.

Because farming didn’t produce huge surpluses, and travel across the terrain was difficult, the Greeks came to depend on the sea. People living near the Mediterranean, Aegean, and Ionian Seas became fishers, sailors, and merchants. Because of Greece’s location in the eastern Mediterranean, it was a perfect location for trade. Greek sailors were highly skilled, and traveled as far as ancient Egypt to trade their products. Greek merchants competed with traders from other Mediterranean cultures. One of these cultures was the Phoenicians. Traders from all over were eager to exchange their goods for Greece’s olive oil, wool, and wine. Those who traded with the Greeks especially prized Greece's olive oil. It added flavor to food, along with its usefulness as a lamp fuel and body lotion.

Handout 2

Answer the following questions based on your reading from Handout 1. Then put your answers into the Cause and Effect graphic organizer at the bottom of this page.

1. What physical features make up nearly three-fourths of Greece?

_____________________________________________________________________
_____________________________________________________________________

2. How does such an environment affect life there?

_____________________________________________________________________
_____________________________________________________________________

3. What effects did geography have on the ways ancient Greeks met their needs?

_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

4. How did the limited amount of fertile land cause the Greeks to become sea traders?

5. What physical features make up nearly three-fourths of Greece?

*Three-fourths of Greece is mountains and hills.*

6. How does such an environment affect life there?

The rugged, rocky, hilly landscape provided few natural resources for early people. Farmers herded goats and sheep on the hillsides. Land travel was difficult, so Greeks relied on the sea for travel.

7. What effects did geography have on the ways ancient Greeks met their needs?

The Greeks had to raise crops and animals suited to the hilly environment and the climate of hot, dry summers and wet winters. Their crops were wheat, barley, olives and grapes. Herds of sheep, goats, and cattle grazed on the shrubs on the many hills and mountains.

8. How did the limited amount of fertile land cause the Greeks to become sea traders?

*Because farming didn’t produce surpluses, the Greeks came to depend on the sea. People became fishers, sailors, and merchant traders. Greek sailors were highly skilled. Those who traded with the Greeks especially prized Greece’s olive oil.*

Make pictures to represent each.

sea               natural resource

mountains          rocky

islands            fertile

(Print on Backside of Cause and Effect Handout)
At the same time that the Shang dynasty was ruling much of the Huang He River valley and the Egyptian pharaohs were building the New Kingdom along the Nile another civilization was beginning along the northeastern shores of the Mediterranean Sea. Greeks found themselves on a peninsula, a piece of land almost entirely surrounded by the sea, with a rocky landscape that offered few natural resources. The modern day country of Greece includes not only the mainland portion, but also includes hundreds of islands. Mountains and hills cover nearly three-quarters of Greece. The land is not very fertile, either, but farmers herd sheep and goats on the rugged hillsides. Eastern Greece has more land suitable for farming. Ancient Greeks raised crops and animals well suited to the environment. The many hills and mountains provided shrubs to feed the herds of sheep, goats, and cattle. Because farming didn’t produce huge surpluses, and travel across the terrain was difficult, the Greeks came to depend on the sea. Traders from all over were eager to exchange their goods for Greece’s olive oil, wool, and wine.
A Summary on the Geography of Ancient Greece

As the Chinese and Egyptian civilizations were developing along rivers, the Greek civilization was developing along the Mediterranean Sea. Since Greece does not have many rivers, it did not have much rich farmland. Also, the Greeks had few natural resources due to the rocky landscape. Greece has many islands, but they are not very good for farming. Nearly three-fourths of Greece is covered by hills and mountains. Because of the hills and mountains, it made it really hard to travel and farm.

On the peninsula of Attica, in the eastern part of Greece, there is more land suitable for farming. There is a peninsula called Peloponnesus that has a region covered with mountains, and it has rivers. The challenge for early farmers was the climate of Greece. The terrain supplied food for the sheep, goat and cattle. Since Greece was located in the Mediterranean, it was the best area for trade. Highly skilled sailors would travel great distances just to trade their goods. Some of Greece's goods were wool, olive oil and wine. Therefore, Greeks came to depend on the sea because travel was difficult on land, and farming was not very profitable, but trading and fishing were possible in the Mediterranean.

ELL ADAPTATION/ELL III:

At the same time that the Shang dynasty and the Egyptian civilizations developed along rivers, the Greek civilization developed along the Mediterranean Sea. Greece did not have many rivers. The Greeks were on a peninsula which has few natural resources and is rocky. Greece has many islands.

Almost three-fourths of Greece is hills and mountains. The land is not fertile either, but is good for sheep and goats. Eastern Greece has more fertile land and rivers. Greeks raised crops and animals suited to the environment. Since Greece is not good for land travel Greeks traveled on the Mediterranean Sea. It was a good area for trade. Greece’s goods were wool, olive oil and wine.
